

Backup and recovery plan

Plan how to recover before something goes wrong.

FROM THE SETLY PROJECT LIBRARY

A real project screenshot for visual inspiration. Follow the written steps for your own business.

YOUR ACTION PLAN

- 1 Identify what must be backed up: content, data, files and configuration.
- 2 Record the platform's available backup or export options.
- 3 Assign frequency, retention and a secure storage owner.
- 4 Test restoring a safe copy rather than assuming a backup can be used.

EXAMPLE - ILLUSTRATIVE

A copy of page text alone will not restore a store's order data or configuration.

CHECK YOUR RESULT

Has someone demonstrated recovery in a safe environment?

Backup and recovery plan

Use the prompts below to make this resource specific to your business. Save a local copy after completing it. Keep passwords and private customer data out of this worksheet.

Asset:

Backup method:

Frequency:

Storage owner:

Retention:

Restore test:

DONE WHEN

Has someone demonstrated recovery in a safe environment?
