

Create a Wix practice site

Create a separate draft for Harbor Home Care, a fictional home-services business.

THE FINISHED RESULT

The saved draft reopens with your business name, and no existing live website was modified.

Before you start

Environment: Wix Editor, desktop and mobile views

Access and plan: Wix demo account. Preview work can start without a custom domain; domains, bookings and other features depend on the selected plan.

Practice project: Harbor Home Care

Use a separate demo project and fictional information. Record the exact project and version you use. Keep passwords, verification codes and private customer information out of screenshots and notes.

Official walkthroughs

[Wix Help Center](#)

Open the credited publisher walkthrough for current interface instructions and available screenshots, then return to the SETLY exercise. External courses remain with their publishers; this PDF does not reproduce their complete tutorial.

Your practice task

Finish one action at a time. Inspect the resulting screen or record before moving on. If a control differs, check the matching official instructions instead of guessing.

01 / Step 1

Choose a business template whose existing sections include a headline, services and contact details. Open it in Wix Editor; record the template name.

Check: record what changed and confirm you are still working in the intended demo project.

02 / Step 2

Rename the site Harbor Practice. Replace the site name in the header, then save before changing layout.

Check: record what changed and confirm you are still working in the intended demo project.

03 / Step 3

Find the page menu and identify Home. Remove demo claims from that page, including awards, customer logos and testimonials that do not belong to this fictional business.

Check: record what changed and confirm you are still working in the intended demo project.

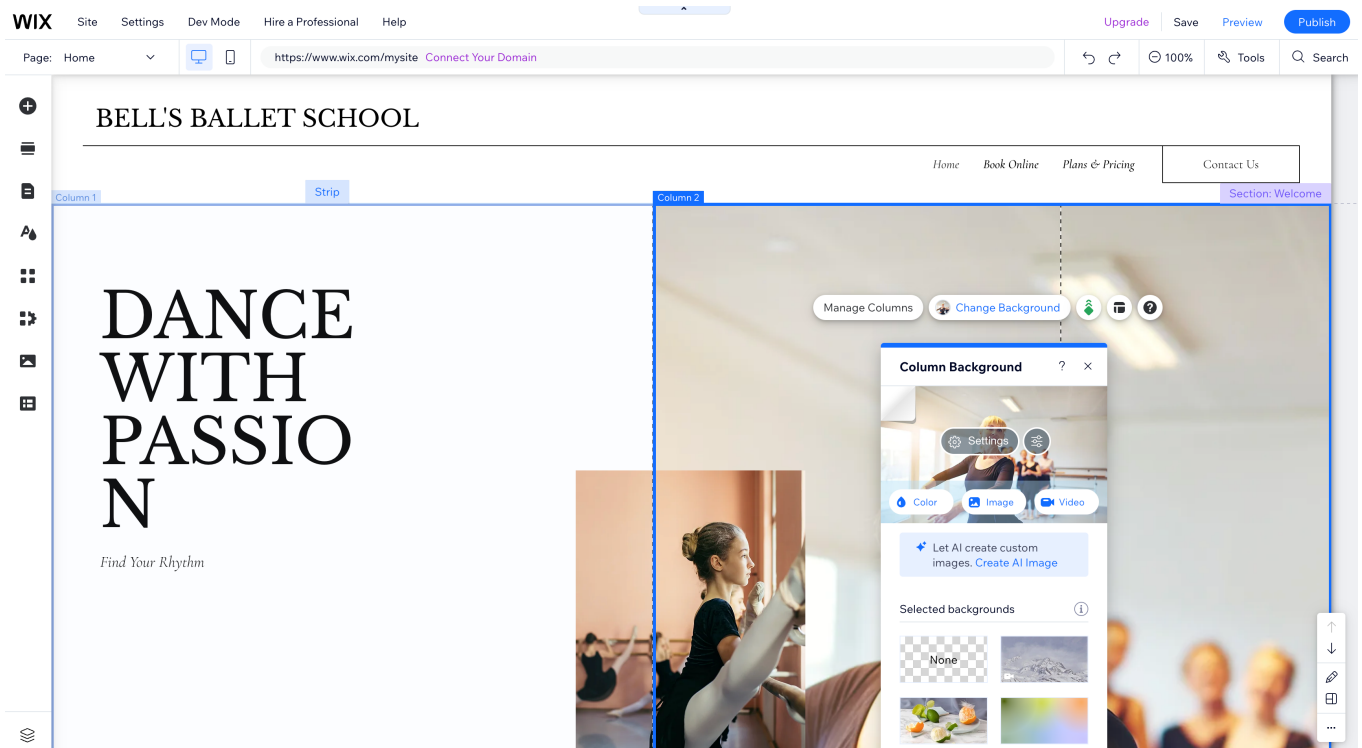

04 / Step 4

Open Preview, return to the editor, and locate the saved draft again from the site dashboard.

Check: record what changed and confirm you are still working in the intended demo project.

The Wix Editor workspace

Orient yourself in the Editor. This is the publisher's example, so its page content differs from Harbor.

Source: Wix Help Center. Credited interface screenshot excerpt; Wix retains rights. No open-content license is claimed.

Test, troubleshoot, repeat.

If something goes wrong

If you opened Wix Studio or Harmony, use that editor's own course rather than mixing its controls with this Editor path.

If your screen is different

Compare the product, editor, user permissions and selected account with the guide. Open the official reference for your version. Do not perform a live change whose effect you cannot verify.

Final verification

The saved draft reopens with your business name, and no existing live website was modified.

Repeat the task with one small variation. Record the test date, project/version, expected result, observed result and a non-sensitive evidence reference. Mark skipped checks as untested.

Your evidence record

Test date: _____ Project/version: _____

Observed result: _____

Evidence reference: _____

Remaining issue and next action: _____

Sources and guide status

Original exercise by Ray / SETLY. Credited technical references are linked on page one. Prepared 1 October 2026. SETLY screen recording and independent learner reproduction are not yet complete. No platform affiliation is implied.
