

Build a business homepage

Create a homepage with three services and a contact action.

THE FINISHED RESULT

All three services are readable, the contact button reaches its intended destination, and mobile content does not overlap.

Before you start

Environment: Wix Editor, desktop and mobile views

Access and plan: Wix demo account. Preview work can start without a custom domain; domains, bookings and other features depend on the selected plan.

Practice project: Harbor Home Care

Use a separate demo project and fictional information. Record the exact project and version you use. Keep passwords, verification codes and private customer information out of screenshots and notes.

Official walkthroughs

[Wix Editor: Adding and editing text](#)

[Wix Editor: Adding and setting up a button](#)

[Wix: mobile editor](#)

Open the credited publisher walkthrough for current interface instructions and available screenshots, then return to the SETLY exercise. External courses remain with their publishers; this PDF does not reproduce their complete tutorial.

Your practice task

Finish one action at a time. Inspect the resulting screen or record before moving on. If a control differs, check the matching official instructions instead of guessing.

01 / Step 1

Replace the main heading with Practical home care, planned around you. Under it, add Routine cleaning, seasonal deep cleans and move-out support. Use Edit Text on the selected text element.

Check: record what changed and confirm you are still working in the intended demo project.

02 / Step 2

Create three service items named Routine clean, Deep clean and Move-out clean. Give each a short scope description; remove unsupported price or availability claims.

Check: record what changed and confirm you are still working in the intended demo project.

03 / Step 3

Add a button labelled Ask about a clean. In its link settings choose your Contact page or contact section, then confirm the destination and save.

Check: record what changed and confirm you are still working in the intended demo project.

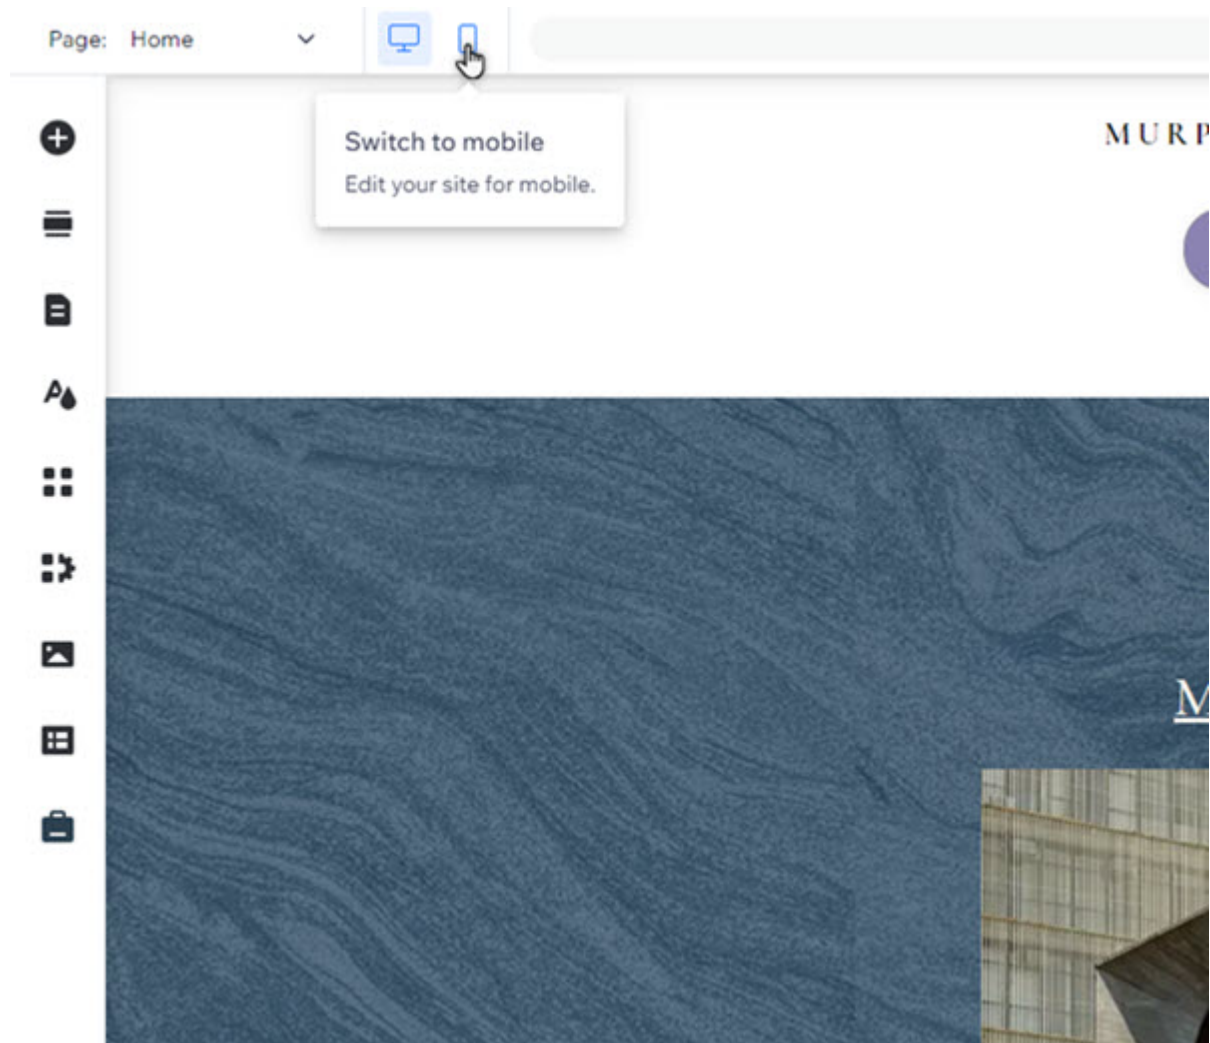

04 / Step 4

Switch to mobile. Stack the services, shorten overlong lines and move overlapping elements. Preview both views and click the contact button.

Check: record what changed and confirm you are still working in the intended demo project.

Switch to the mobile editor

Shows the location of the mobile-view control discussed in the exercise. The publisher's example is not the Harbor project.

The Wix Editor workspace

Orient yourself in the Editor. This is the publisher's example, so its page content differs from Harbor.

Test, troubleshoot, repeat.

If something goes wrong

If the button appears inactive in the editor, test in Preview. If it reaches the wrong place, reselect its destination rather than only changing its label.

If your screen is different

Compare the product, editor, user permissions and selected account with the guide. Open the official reference for your version. Do not perform a live change whose effect you cannot verify.

Final verification

All three services are readable, the contact button reaches its intended destination, and mobile content does not overlap.

Repeat the task with one small variation. Record the test date, project/version, expected result, observed result and a non-sensitive evidence reference. Mark skipped checks as untested.

Your evidence record

Test date: _____ Project/version: _____

Observed result: _____

Evidence reference: _____

Remaining issue and next action: _____
