

# Add pages and navigation

Make Home, Services and Contact reachable through one consistent menu.

## THE FINISHED RESULT

Every visible menu item reaches the correct page, and a visitor can return Home from all pages.

## Before you start

Environment: Wix Editor, desktop and mobile views

Access and plan: Wix demo account. Preview work can start without a custom domain; domains, bookings and other features depend on the selected plan.

Practice project: Harbor Home Care

Use a separate demo project and fictional information. Record the exact project and version you use. Keep passwords, verification codes and private customer information out of screenshots and notes.

## Official walkthroughs

[Wix Help Center](#)

Open the credited publisher walkthrough for current interface instructions and available screenshots, then return to the SETLY exercise. External courses remain with their publishers; this PDF does not reproduce their complete tutorial.

# Your practice task

Finish one action at a time. Inspect the resulting screen or record before moving on. If a control differs, check the matching official instructions instead of guessing.

## 01 / Step 1

Open the page menu and create Services and Contact as normal site pages. Give each a descriptive page heading.

Check: record what changed and confirm you are still working in the intended demo project.

## 02 / Step 2

Populate Services with the three service descriptions from your homepage. Add a clear next action pointing to Contact.

Check: record what changed and confirm you are still working in the intended demo project.

## 03 / Step 3

Arrange the main menu as Home, Services, Contact. Keep draft or duplicate pages out of the menu until they are ready.

Check: record what changed and confirm you are still working in the intended demo project.

## 04 / Step 4

Preview from Home and visit every menu item. Return through the menu rather than the browser Back button; repeat in mobile view.

Check: record what changed and confirm you are still working in the intended demo project.

# Test, troubleshoot, repeat.

## If something goes wrong

If a page exists but is absent from the menu, check its menu visibility and whether you are editing the intended menu.

## If your screen is different

Compare the product, editor, user permissions and selected account with the guide. Open the official reference for your version. Do not perform a live change whose effect you cannot verify.

## Final verification

Every visible menu item reaches the correct page, and a visitor can return Home from all pages.

Repeat the task with one small variation. Record the test date, project/version, expected result, observed result and a non-sensitive evidence reference. Mark skipped checks as untested.

## Your evidence record

Test date: \_\_\_\_\_ Project/version: \_\_\_\_\_

Observed result: \_\_\_\_\_

Evidence reference: \_\_\_\_\_

Remaining issue and next action: \_\_\_\_\_

## Sources and guide status

Original exercise by Ray / SETLY. Credited technical references are linked on page one. Prepared 1 October 2026. SETLY screen recording and independent learner reproduction are not yet complete. No platform affiliation is implied.
