

Add useful images

Add a relevant image without sacrificing readability or loading speed.

THE FINISHED RESULT

The subject is visible in both layouts, the image has an appropriate text alternative, and its reuse permission is recorded.

Before you start

Environment: Wix Editor, desktop and mobile views

Access and plan: Wix demo account. Preview work can start without a custom domain; domains, bookings and other features depend on the selected plan.

Practice project: Harbor Home Care

Use a separate demo project and fictional information. Record the exact project and version you use. Keep passwords, verification codes and private customer information out of screenshots and notes.

Official walkthroughs

[Wix Help Center](#)

[W3C: Developing for accessibility](#)

Open the credited publisher walkthrough for current interface instructions and available screenshots, then return to the SETLY exercise. External courses remain with their publishers; this PDF does not reproduce their complete tutorial.

Your practice task

Finish one action at a time. Inspect the resulting screen or record before moving on. If a control differs, check the matching official instructions instead of guessing.

01 / Step 1

Choose an image you own or are allowed to use. Record its source and intended role before uploading it to the media manager.

Check: record what changed and confirm you are still working in the intended demo project.

02 / Step 2

Replace a template image and adjust its crop so the subject remains visible at desktop width. Avoid putting essential instructions inside an image.

Check: record what changed and confirm you are still working in the intended demo project.

03 / Step 3

Write descriptive alternative text for informative images. Keep decorative images from repeating nearby text in their description.

Check: record what changed and confirm you are still working in the intended demo project.

04 / Step 4

Preview the image on mobile and inspect its focal point. Compare the uploaded file size with the original; retain a reusable copy outside Wix.

Check: record what changed and confirm you are still working in the intended demo project.

Test, troubleshoot, repeat.

If something goes wrong

If the image looks blurry, check its original dimensions and the size of the displayed frame before uploading a larger file.

If your screen is different

Compare the product, editor, user permissions and selected account with the guide. Open the official reference for your version. Do not perform a live change whose effect you cannot verify.

Final verification

The subject is visible in both layouts, the image has an appropriate text alternative, and its reuse permission is recorded.

Repeat the task with one small variation. Record the test date, project/version, expected result, observed result and a non-sensitive evidence reference. Mark skipped checks as untested.

Your evidence record

Test date: _____ Project/version: _____

Observed result: _____

Evidence reference: _____

Remaining issue and next action: _____

Sources and guide status
