

Edit page SEO settings

Give Home and Services accurate search titles and descriptions.

THE FINISHED RESULT

The live page metadata matches the intended copy. No promise is made about when search results will update.

Before you start

Environment: Wix Editor, desktop and mobile views

Access and plan: Wix demo account. Preview work can start without a custom domain; domains, bookings and other features depend on the selected plan.

Practice project: Harbor Home Care

Use a separate demo project and fictional information. Record the exact project and version you use. Keep passwords, verification codes and private customer information out of screenshots and notes.

Official walkthroughs

[Wix Help Center](#)

[Google Search Central: SEO Starter Guide](#)

Open the credited publisher walkthrough for current interface instructions and available screenshots, then return to the SETLY exercise. External courses remain with their publishers; this PDF does not reproduce their complete tutorial.

Your practice task

Finish one action at a time. Inspect the resulting screen or record before moving on. If a control differs, check the matching official instructions instead of guessing.

01 / Step 1

Write a different title for each page using its purpose and business name. Avoid repeating the same generic title everywhere.

Check: record what changed and confirm you are still working in the intended demo project.

02 / Step 2

In the relevant page's SEO settings, enter the title and a concise description that accurately explains its content.

Check: record what changed and confirm you are still working in the intended demo project.

03 / Step 3

Review the page URL and indexability settings. Do not rename an existing public URL casually; record any redirect needed before approval.

Check: record what changed and confirm you are still working in the intended demo project.

04 / Step 4

After an approved publication, inspect the live page title and description. Record the published URL and date, separating this verification from search-engine indexing.

Check: record what changed and confirm you are still working in the intended demo project.

Test, troubleshoot, repeat.

If something goes wrong

If search results still show older text, first check the published page. Search-engine recrawling and snippet selection are separate from saving your settings.

If your screen is different

Compare the product, editor, user permissions and selected account with the guide. Open the official reference for your version. Do not perform a live change whose effect you cannot verify.

Final verification

The live page metadata matches the intended copy. No promise is made about when search results will update.

Repeat the task with one small variation. Record the test date, project/version, expected result, observed result and a non-sensitive evidence reference. Mark skipped checks as untested.

Your evidence record

Test date: _____ Project/version: _____

Observed result: _____

Evidence reference: _____

Remaining issue and next action: _____

Sources and guide status

Original exercise by Ray / SETLY. Credited technical references are linked on page one. Prepared 1 October 2026. SETLY screen recording and independent learner reproduction are not yet complete. No platform affiliation is implied.
