

Publish and test a Wix site

Release an approved practice site and verify the visitor journey.

THE FINISHED RESULT

A signed-out visitor can complete the stated journey on the published site; failures have owners and retest notes.

Before you start

Environment: Wix Editor, desktop and mobile views

Access and plan: Wix demo account. Preview work can start without a custom domain; domains, bookings and other features depend on the selected plan.

Practice project: Harbor Home Care

Use a separate demo project and fictional information. Record the exact project and version you use. Keep passwords, verification codes and private customer information out of screenshots and notes.

Official walkthroughs

[Wix Help Center](#)

Open the credited publisher walkthrough for current interface instructions and available screenshots, then return to the SETLY exercise. External courses remain with their publishers; this PDF does not reproduce their complete tutorial.

Your practice task

Finish one action at a time. Inspect the resulting screen or record before moving on. If a control differs, check the matching official instructions instead of guessing.

01 / Step 1

Review every page for remaining template copy, broken links, unlicensed imagery and accidental personal data. Check desktop and mobile previews.

Check: record what changed and confirm you are still working in the intended demo project.

02 / Step 2

Record the destination URL, owner approval and a recovery plan. Distinguish a new test-site publication from overwriting an existing live site.

Check: record what changed and confirm you are still working in the intended demo project.

03 / Step 3

Publish to the approved destination. Open that URL in a separate signed-out browser session, not only inside the editor.

Check: record what changed and confirm you are still working in the intended demo project.

04 / Step 4

Test menu links, contact actions and any enabled forms or bookings. Record observed results with screenshots and remove only the demo records you created.

Check: record what changed and confirm you are still working in the intended demo project.

Test, troubleshoot, repeat.

If something goes wrong

If you see older content, confirm the URL and publication state, then refresh. Do not call preview-only changes published.

If your screen is different

Compare the product, editor, user permissions and selected account with the guide. Open the official reference for your version. Do not perform a live change whose effect you cannot verify.

Final verification

A signed-out visitor can complete the stated journey on the published site; failures have owners and retest notes.

Repeat the task with one small variation. Record the test date, project/version, expected result, observed result and a non-sensitive evidence reference. Mark skipped checks as untested.

Your evidence record

Test date: _____ Project/version: _____

Observed result: _____

Evidence reference: _____

Remaining issue and next action: _____

Sources and guide status

Original exercise by Ray / SETLY. Credited technical references are linked on page one. Prepared 1 October 2026. SETLY screen recording and independent learner reproduction are not yet complete. No platform affiliation is implied.
