

Website migration map

Move pages deliberately and avoid losing useful links.

FROM THE SETLY PROJECT LIBRARY

A real project screenshot for visual inspiration. Follow the written steps for your own business.

YOUR ACTION PLAN

- 1 Inventory existing URLs and identify the pages worth preserving.
- 2 Map each old URL to the most relevant new destination.
- 3 Record forms, analytics and connected services that must move too.
- 4 Test representative redirects and important journeys after release.

EXAMPLE - ILLUSTRATIVE

An old services page should lead to its replacement service page rather than an unrelated homepage.

CHECK YOUR RESULT

Do high-value old links reach relevant destinations?
