

Domain connection preparation

Prepare a domain change without disrupting business email.

FROM THE SETLY PROJECT LIBRARY

A real project screenshot for visual inspiration. Follow the written steps for your own business.

YOUR ACTION PLAN

- 1 Record the domain registrar, DNS provider and the account owner.
- 2 Save a copy of existing DNS records before any edits.
- 3 Get the exact connection records from Wix's current domain instructions; distinguish website records from email records.
- 4 Plan a verification check for both the website and business email after the change.

EXAMPLE - ILLUSTRATIVE

Moving a website does not mean replacing the mail records used by the company's inbox.

CHECK YOUR RESULT

Have you recorded the original settings and a recovery contact before editing DNS?

Domain connection preparation

Use the prompts below to make this resource specific to your business. Save a local copy after completing it. Keep passwords and private customer data out of this worksheet.

Domain:

Registrar:

DNS provider:

Website records to change:

Email records to preserve:

Verification owner:

DONE WHEN

Have you recorded the original settings and a recovery contact before editing DNS?
